Maury Johnson  
Blue River Organic Seeds  
27087 Timber Road  
Kelly, IA 50134

Dear Maury Johnson:

This letter is to notify you that the hybrid seed corn varieties coated with NII Film Coat certified by OCIA International to the NOP program can only make the label claim as organic per 205.301(b) of the National Organic Program Final Rule. The hybrid seed corn varieties not coated with NII Film Coat are 100% organic per 205.301(a). The soybean seeds can make the label claim of 100% organic per 205.301(a) of the National Organic Program Final Rule as there are no seed treatments. The red clover you sell is pre-inoculated with Dormal and are certified as organic per 205.301(b). The BMR Hawk 12 Sudangrass is not treated and is 100% organic. The Roadrunner alfalfa coated with Apex and all alfalfa seeds are pre-treated with the inoculant, Nitragin are certified as organic per 205.301(b).

Please do not hesitate to contact me if you have any questions or need additional assistance.

Respectfully;

Ann Tvrdy  
Certification Coordinator
